POWER PROTECTION

Computers, networks and sensitive equipment are all at risk from common power disturbances – surges, sags, brownouts, spikes and blackouts not only interfere with operation but can even destroy your hardware, causing a devastating impact on your business or home.

POWERSMART provide a range of portable surge and lightning protection products to protect computer systems, peripherals and point of sale equipment.

The **POWERSMART 300** protects computers, electrical and telephone equipment from up to 66,000 Amps of surge current. Its unique design features six wider power outlets suitable for large power adaptors – allowing you to use all power outlets at the same time. With telephone line protection including two outlets, protection and fault alerts, a 1.8 metre power cord and a ten year warranty, the **POWERSMART 300** is the most dynamic unit on the market.

FEATURES

Wider power outlets fit large power adaptors

Phone and fax line protection with two outputs

Alerts protection and fault status

Built-in resettable circuit breaker

POWER OUTLET PROTECTION

Power rating	230-240Va.c. 50Hz
Current	10A (max.)
Handling	2400 Watt
Protection mode	Active-Neutral-Earth
Surge current	66,000 Amps
Surge protection	Metal Oxide Varistors
Typical capacitance	400pf
Clamping voltage	<275V (at 50A)
Energy absorption	1950 Joules
Response time	1-3 nano seconds
Filtration protection	40db EMI and REI

TELEPHONE LINE PROTECTION

Maximum impulse breakdown current	1,000V
Maximum impulse discharge current	10KA
Maximum capacitance	20pf
Surge protection	Gas Tube Arrestor
